

Assignment 1: Keyword Research and Clustering for Blog Optimization

Brand Information:

Brand Name: Fable

Industry/Niche: B2C/ Digital media and entertainment industry with ED Tech elements.

About the Brand: Fable is a social reading app designed for book lovers and TV enthusiasts to discover, track, and discuss stories through digital book clubs and “TV clubs.” It offers a modern way to explore, organize, and engage with the world’s best stories across books and television.

Fable is more than just a social app—it focuses on digital wellness and building meaningful human connections. Users can discover books and TV shows carefully curated each month by tastemakers and experts, including authors, artists, academics, athletes, and industry leaders.

Assignment Brief: I am working as an SEO Trainee for “**Fable**”. The company is planning to publish a blog post on its official website to drive organic traffic & capture new leads.

Blog Topic: “Best Online Book Clubs & Reading Apps for Book Lovers in 2026”.

Target Audience: Fable’s target audience is split into some groups –

- **New Readers:** People who want to start reading but don't know which book to pick.
- **Busy Professionals:** People who have very little time due to work or studies.
- **Social Readers:** Users who like sharing opinions and discussing books with others.
- **Book Lovers:** Regular readers who already have a strong reading habit.
- **Goal-Oriented Readers:** People who like tracking progress and completing reading targets.
- **Learning-Oriented Readers:** Users who read for knowledge, skills, or self-improvement.
- **Story Lovers:** Users who enjoy both books and TV/web series stories.

Blog Goal: The goal of the blog is to increase organic traffic by attracting users searching for reading apps and online book clubs. It also aims to educate readers, build awareness of the Fable app, and encourage them to explore and use it for a better reading experience.

Intent behind the topic:

- a. Users searching for Fable platform and app details

- b. Users comparing Fable with other B2C reading apps.
- c. Users searching for best reading apps.
- d. Users may choose and download an app.
- e. Users want a better and engaging reading experience.
- f. Users searching for a digital book club.
- g. Users searching for a digital book club and tv clubs.
- h. Users searching Scribd products.
- i. Users looking for free vs paid reading apps.
- j. Users searching for features like reading tracker, challenges and community.
- k. Users looking for book recommendations or trending books.

Pain Points & Motivations

Pain points:

Limited Advanced Features: Compared to Storygraph, Fable lacks detailed reading stats, mood tracking, and deep analytics.

Smaller Book Database: Unlike Goodreads, Fable has a smaller collection and fewer user reviews.

Paid Feature Limitations: Many features are free in Goodreads, but Fable has some restrictions under subscription.

Complex User Interface: Social features make the app slightly overwhelming for new users.

Limited Awareness in Market: Many users are still not aware of Fable compared to popular apps.

Missing Advanced Reader Tools: Features like content warnings, deep insights, and analytics are limited compared to competitors.

Dependence on Community Activity: User experience depends on active participation; inactive groups reduce engagement.

Motivations point:

Personalized Recommendations

Want book suggestions based on interests, prefer content tailored to reading habits.

Reading Progress Tracking

Want to track completed and ongoing books, like setting goals and monitoring progress.

Simple User Experience

Prefer easy navigation, want a clean and user-friendly interface.

Variety of Content

Look for different genres and options, want access to a large collection of books.

Affordable Access

Prefer free or low-cost features, avoid high subscription costs.

Active Community

Want to join discussions and book clubs, like sharing reviews and opinions.

Flexible Reading Options

Prefer both social and private reading modes, want control over interaction level.

Trust & Reliability

Prefer well-known and trusted platforms, rely on reviews and ratings.

Advanced Features

Expect tools like recommendations and insights, want better reading experience features.

Trends:

Nowadays, reading is not just about sitting alone with a book. According to Fable's approach, people enjoy reading more when they can connect with others, share their thoughts, and be part of a community. Reading is slowly becoming a daily

habit and a more interactive experience rather than just a personal activity.

- People prefer reading with others through book clubs.
- Users enjoy sharing reviews and opinions.
- Many readers are building a daily reading habit.
- Simple and guided book suggestions are preferred.
- Users like having books and discussions in one place.
- Reading is becoming more engaging and less boring.

Keyword Research

Keyword Type	Keywords
